

Clinical Application Specialist, CorFlow Therapeutics AG, Switzerland

About CorFlow Therapeutics AG

CorFlow Therapeutics (www.corflow-therapeutics.ch Baar, Switzerland), is developing proprietary technologies to measure the coronary microvascular status and provide therapy to the compromised coronary microcirculation in the catheter laboratory after heart attack.

The CorFlow Controlled Flow Infusion (CoFI™) technology is in the early phases of development and its use is under investigation through the MOCA I study.

We are looking for an enthusiastic and flexible person to join our team in supporting and proctoring the cases in the catheter laboratory where the physician will use the CoFI™ device under investigation for heart attack patients.

Job Description:

As a Clinical Application Specialist, you will:

- assist physicians and study nurses in the use of our CoFI system in the catheter laboratory in the context of our clinical study
- coordinate with clinical staff to ensure proper set up of the device and manipulation of the device during the procedures
- supervise trained physicians/study nurses before they are released to manipulate the device by themselves
- provide troubleshooting support as requested in case of device deficiency or operator deficiency
- report direct and immediate feedback to the R&D/Clinical Team about any issue encountered during the procedure
- counter check availability of device/accessories at sites

In this position you will be requested to be in proximity of our enrolling sites (located in Switzerland Bern-Lausanne-Geneve-Zurich-Lugano) 3-4 times/month for 3-4 days or more (also weekends) and be available at occurrence (i.e. presentation of cases) during the day and/or night.

Requirements:

- Sound Knowledge of fluid dynamics – pumps system
- Engineering background or Life Science
- Excellent interpersonal skills
- Excellent communications skills and ability to interact with staff and management
- Proven ability to handle personnel actions
- Fluent English (French and German would be a plus)
- Flexibility
